Lion Copolymer appoints Omya as Distributor

Lion Copolymer has appointed Omya Group as the distributor of its Royalene[®] EPDM products for Europe. The product range also includes the Trilene[®] liquid EPDM, and Celogen foaming agents

Baton Rouge Louisiana based Lion Copolymer, one of the worlds major producers of EPDM has appointed the Omya Group as its distributor in Europe.

Omya will sell the well known and regarded Royalene[®] range of EPDM products as well as the speciality Royaltherm[®] materials. Omya will also focus on the Trilene[®] liquid EPDM products which offer interesting properties not only for traditional elastomer compounding but also in adhesives and sealants and rotomoulding.

By working in close cooperation Lion Copolymer and Omya plan to increase the share of the European EPDM market enjoyed by the Royalene[®] products and the Omya technical sales force, present in all European countries, will play a major role.

In addition to the EPDM products the agreement also covers the Celogen[®] range of chemical foaming agents.

For Omya the Lion EPDM range is an excellent fit with the activities the Group has in selling the Multisperse[®] range of pre dispersions for elastomer compounding and the Caloxol[®] Calcium Oxide products.

Omya is a leading global producer of industrial minerals, mainly fillers and pigments derived from calcium carbonate and dolomite, and a worldwide distributor of chemical products. The company's major markets are the paper, plastics, paint/coatings/adhesives industries as well as construction, environment, agriculture, food and pharma. Founded in 1884 in Switzerland, Omya now has global presence extending to more than 100 locations in over 50 countries and 6000 employees.
