

Omya Engineered Materials

THINKING OF TOMORROW

Omya Group

Omya is a leading global producer of industrial minerals, mainly mineral additives and pigments derived from Calcium Carbonate and Dolomite, and a worldwide distributor of specialty chemicals.

Committed to implementing the principles of sustainability at all company levels, Omya provides value-added products and services from responsibly sourced materials to meet the essential needs of current and future generations.

Omya provides a wealth of product solutions and services that contribute to its customers' competitiveness and productivity in multiple industries: Construction, Technical Polymer Applications, Printing & Writing, Consumer Goods, Packaging, Agriculture & Forestry, Water & Energy.

Expertise

We are more than Minerals...

...we are a global Distributor of Specialty Chemicals
with a Heritage of 125 Years!

Omya as a Solution Provider

- Skilled sales teams and engineers, with long and broad experience, granting ad-hoc solutions
- Offering complementary specialty products from leading suppliers
- Portfolios designed to add value to your formulations
- Comprehensive, flexible, and adaptable logistical solutions
- Long-term & reliable partnerships

Omya Distribution

Omya offers versatile solutions beyond Calcium Carbonate – from raw materials to intermediates and chemical specialties for virtually any application. For over 125 years, Omya has distributed innovative, quality products to customers.

Serving more than 30,000 customers and with annual sales of over CHF 1.2 billion, Omya ranks among the biggest chemical distributors globally. Omya principals are among the leading companies in their respective markets and place the most stringent requirements on their distributors. Omya ensures safety, environmental compliance and adherence to regulations. For Omya customers and partners, this means maximum reliability in quality and delivery.

The distribution business, in conjunction with our own products, provides valuable synergistic effects, especially for our customers. Wherever our main products are used, we assist you with the corresponding distribution solutions. The product and distribution offer complement each other perfectly and provide a highly attractive package.

Our global distribution network allows for the one-stop purchase of our products and our partners' chemicals. You profit from our expertise and our extensive technical support such as analytics, microscopy, microbiology, printing technology and quality management. With our strong focus on innovation, we meet your requirements of today and tomorrow.

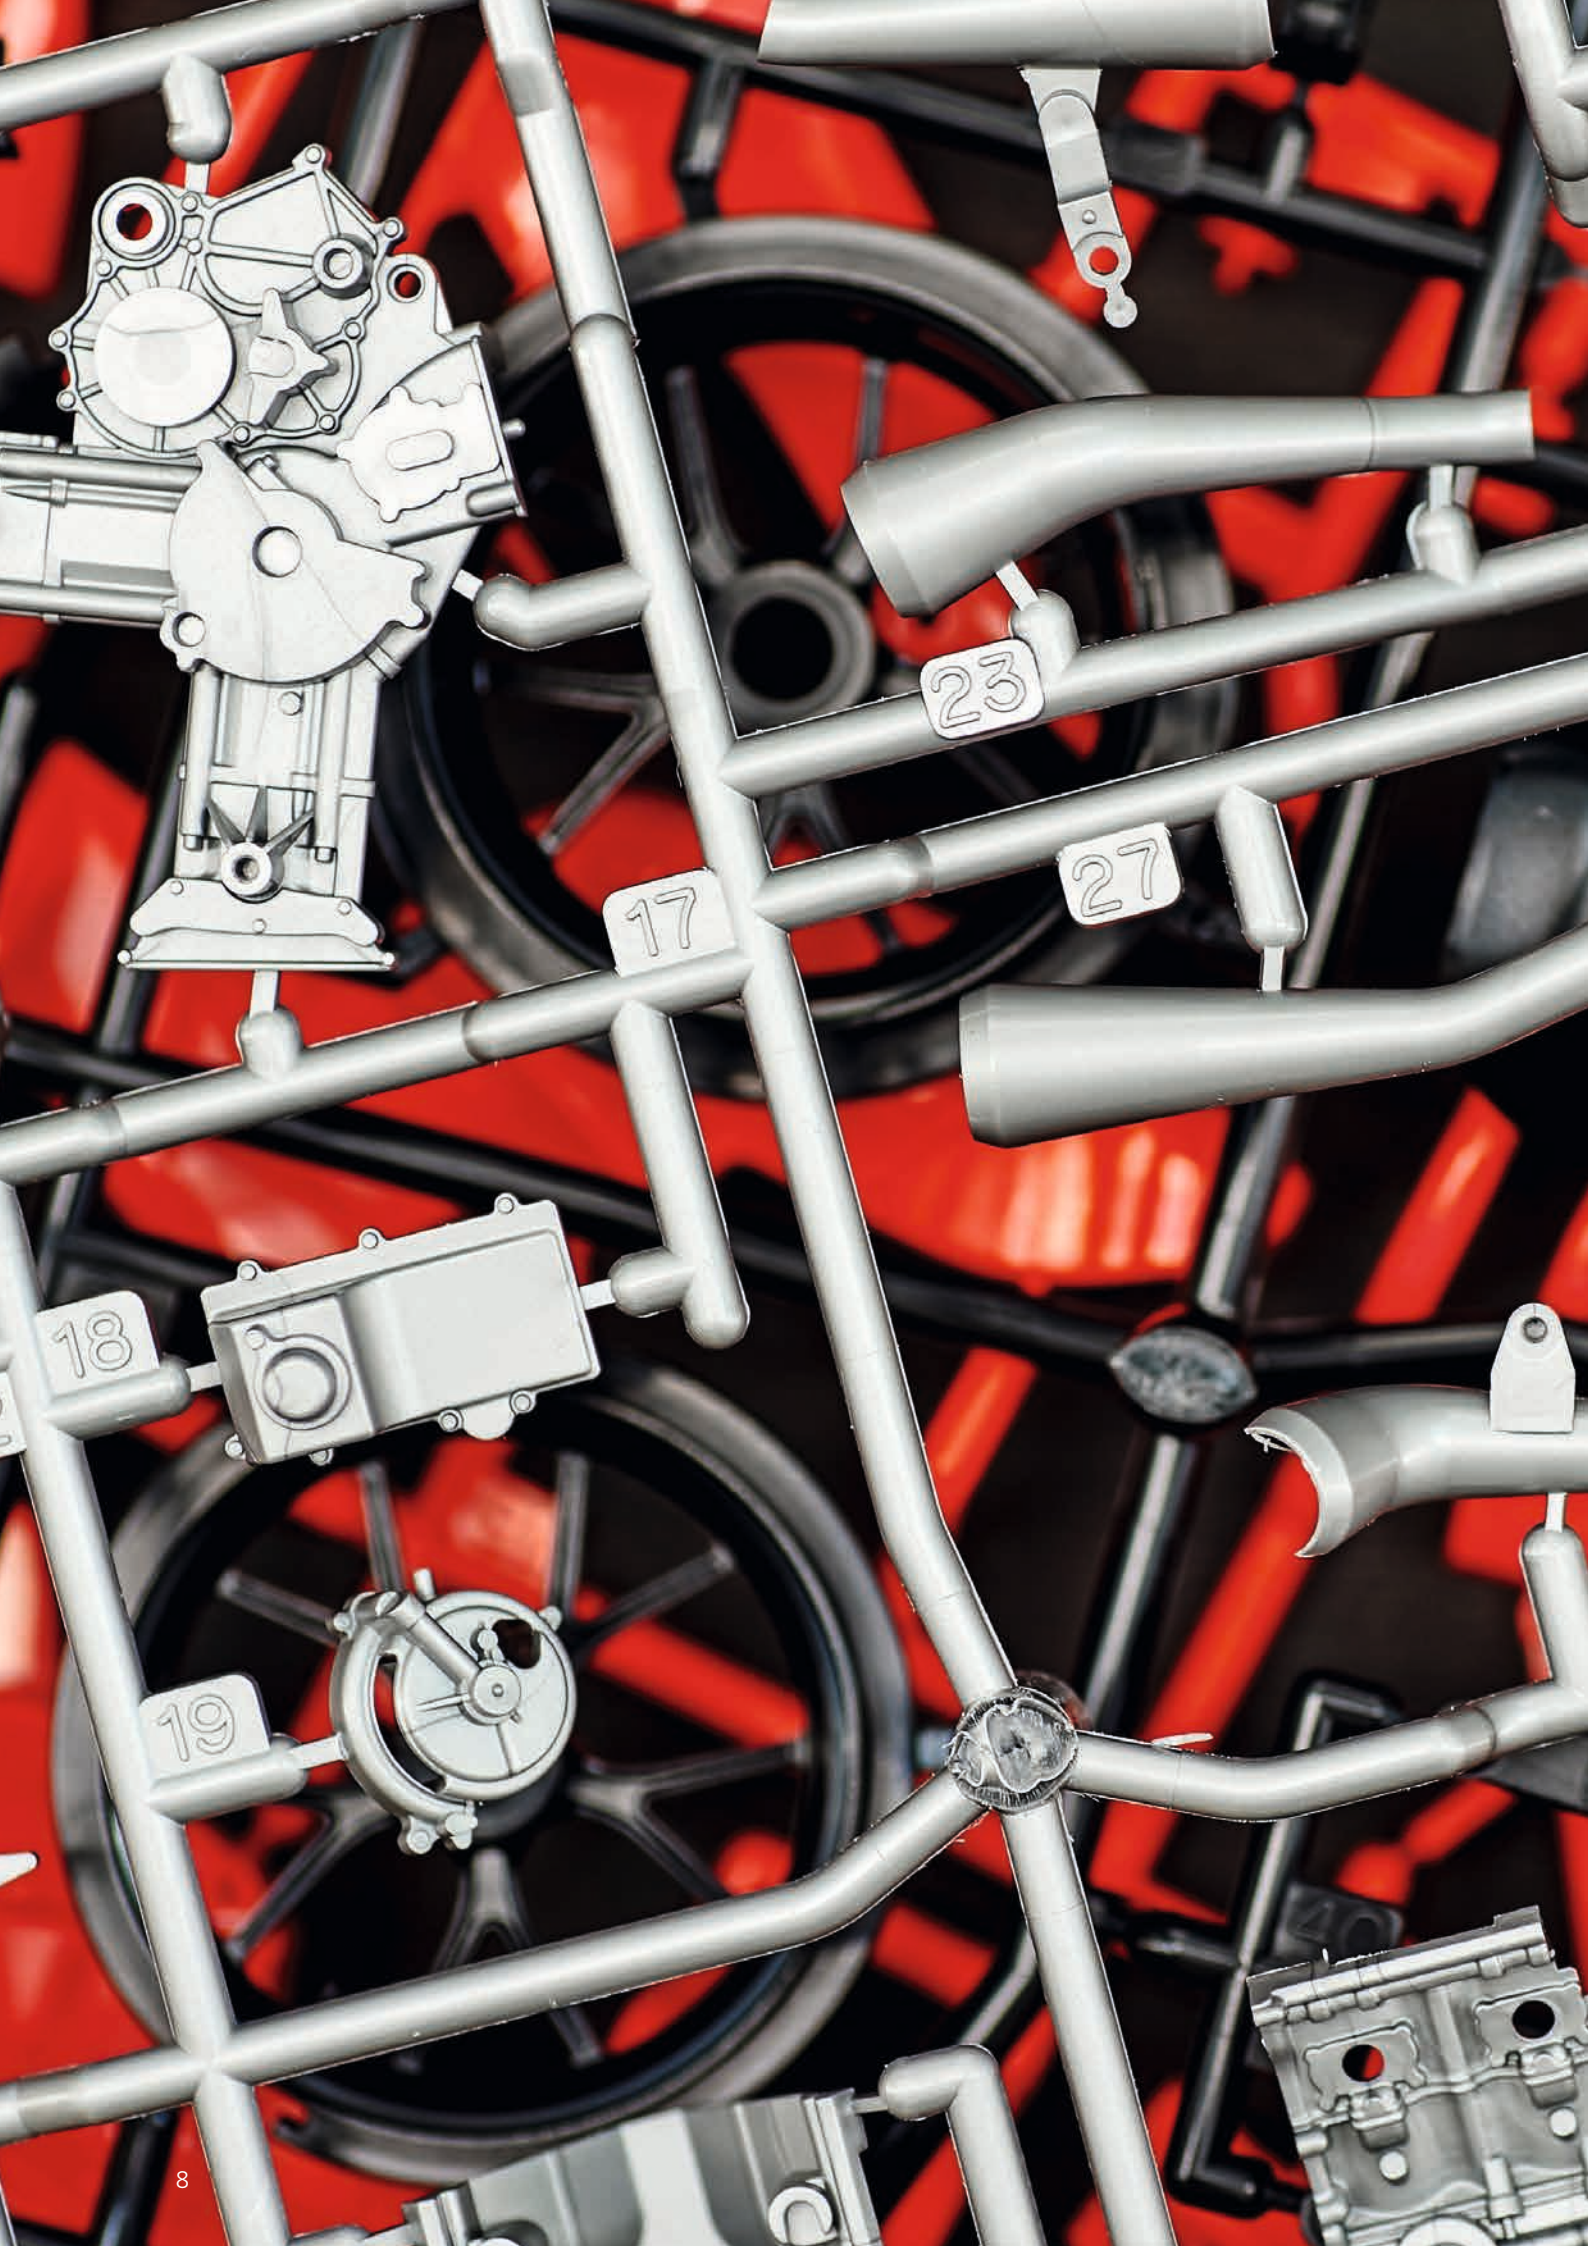

In the plastics and rubber industries, we represent world-class suppliers for products like impact modifiers, rubber predispersions, kaolin, flameretardants and other additives in combination with advice from our sales technicians enable us to supply our customers with a solution tailored to their specific market needs.

Thanks to our top position as suppliers to the leading compounders and extruders in each market also makes us the suppliers of choice for important local players who might be difficult to reach otherwise.

This fact, paired with excellent geographic coverage, makes Omya the ideal marketing partner for our principals.

Omya Engineered Materials

Omya has had a long history in the distribution of Engineered Materials, which began in 1949 with our partnership with Hoechst and a distribution and representation agreement for Switzerland. Since then, we have expanded throughout the years our footprint in Europe and Asia.

Long-term business relationships create certainty and reliability. Some of our principals has collaborated with Omya for over half a century and continues to entrust their representation and distribution activities to us. This is the best recognition we can achieve.

Omya provides ad-hoc Engineered Material Solutions, with the determination of contributing to our customers success, supported by our expertise. As a supplier of Calcium Carbonate and other additives to the plastic industry, Omya has a deep inherent knowledge about polymer compounds and their behavior.

Modern design and engineering includes also high demand on sustainability. Our teams will help you also with this topic. Renewably sourced content and lower carbon footprint are becoming increasingly important. Our teams will help you with the evaluation, which involves identifying the most appropriate material including ad-hoc processing, maximizing yield and minimizing waste and energy consumption.

Omya proudly advises materials and supports application development within a series of market segments. Examples are the automotive industry at various levels, the sanitary industry both on the cold and hot water side and metal replacement in burners/ heat-exchangers, electronics & electrical equipment, sport & leisure and several others.

Technical Services & Innovation

Omya is strongly committed to providing solutions for our customers based on their specific needs and applications. For decades, we have been developing and expanding our technical expertise in all business sectors based on technical customer intimacy. For this reason, more than 100 scientists, engineers and technicians provide, initiate and deliver high-level technical services and innovations, develop new products and improve established ones, and also constantly support our customers with their help and advice.

For decades, Omya has cultivated a tradition of focused and dedicated Technical Service. This track record has given Omya the practical experience and skills to help customers continuously add value by improving their formulations and final products' properties.

Our customers often consult Omya for advice on complex issues, knowing that with our support they will find and rapidly implement sound technical solutions regarding formulation and processing.

We provide on-site technical advice to our customers around the globe on request and can also carry out technical training tailored to the requirements of their employees.

With technical facilities and experts located in our headquarters in Oftringen, we are able to provide technical support on a global and local scale. This is due to our dedicated local technical service hubs in the Americas and Asia, who implement best practices according to local needs.
