

OMYA MADENCİLİK SANAYİ VE TİCARET AŞ.

KEMALPAŞA FACTORY QUALITY AND PRODUCT SAFETY POLICY

In addition to the production of industrial calcium carbonate to be utilized in different sectors, Omya Madencilik A.Ş. Kemalpaşa Factory produces and sells **micronized calcium carbonate** to be used as a **component and/ or additive** in the food, pharmaceutical and cosmetic industries.

Omya Madencilik A.Ş. has established the Quality and Product Safety Policy based on our responsibility of satisfying the requirements and expectations of our customers, supplying safe and high quality products to the sector in terms of human health, common values and principles. The policy was created with respect to those mentioned above as well as the Omya Global Directives for Food, Pharma and Personal Care. The risks of imitation and adulteration have been assessed regarding our products and necessary measures have been determined to minimize possible risks.

In order to fulfill this responsibility, **we are committed to continuously improving and sustaining** our quality and product safety management system in the light of the following principles.

- To provide **hygienic and safe products to our customers by executing our operations in accordance with the national and international food, pharmaceutical, cosmetic regulations and BRC/ FSSC 22000 Quality and Food Safety Management System standard, ICHQ7 Pharmaceutical standard and EffCI Cosmetics standard.**
- To carry out our entire operations within the framework of globally accepted ethical rules.
- To comply with all laws and regulations related to the environment and to sustain our entire operations in a manner that does not harm the environment.

It is the responsibility of all employees of Omya Madencilik A.Ş to act within the framework of the Quality and Product Safety Policy. The commitment and skill of our employees constitutes the basis of our success. We as Omya Madencilik A.Ş undertake to provide all kinds of support for our employees in order to increase their level of consciousness and responsibility regarding quality and product safety.
