# Omya Announces Distribution Agreement with Trinseo

**Cincinnati, OHIO (USA) – February 1, 2023**

**Omya, a leading global producer of industrial minerals and worldwide distributor of specialty chemicals, is pleased to announce a distribution agreement with Trinseo, a specialty materials solutions provider.**

Under the terms of the agreement, Omya will provide high-quality ABS and PC/ABS resins to Trinseo automotive and mobility customers in North America starting February 1, 2023. The materials are offered under Trinseo's well-known brands MAGNUM™ ABS Resins and PULSE™ PC/ABS Resins.

Trinseo's MAGNUM™ ABS Resins are differentiated in the marketplace by continuous mass polymerization manufacturing technology. ABS produced with this technology is purer, cleaner and superior as compared to emulsion ABS, since the continuous process results in a more consistent, stable and reliable product. In addition, mass polymerization technology produces resins with a highly consistent, white base color, resulting in a cost-efficient resin for self-coloring because less pigment is required. Trinseo's PULSE™ PC/ABS Resins provide an ideal mix of mechanical, thermal, and rheological properties for use in both high-performance interior and exterior applications. They are approved for many premium OEM specifications and provide strong technical features, such as low density, low emissions, and high impact strength.

Trinseo sells specialty materials and sustainable solutions to customers directly and through distribution channels, focused on the mobility, building and construction, consumer goods, and medical market sectors. Omya joins a network of Trinseo distributors worldwide that support customer needs.

### About Omya

Omya is a leading global producer of industrial minerals – mainly derived from calcium carbonate, dolomite and perlite – and a worldwide distributor of specialty materials. The company provides innovative products and environmental solutions that contribute to its customers' competitiveness in multiple industries such as Construction, Paper & Board, Polymers, Food, Pharma, Personal & Home Care, Agriculture, Water and Energy. Founded in 1884 in Switzerland, Omya has a global presence extending to more than 160 locations in over 50 countries with 9,000 employees.
